

Walking & Bicycling Questionnaire for Candidates

This State candidate questionnaire was developed by Hawaii Bicycling League, Kauai Path, Maui Bicycling League, and PATH - Peoples Advocacy for Trails Hawaii to address current state issues of importance for walking and bicycling. Your responses will be made available online and distributed to our organizations' email networks. Your response will NOT be used as the basis for any endorsements - your response will be displayed verbatim. Please respond by July 25, 2016. Late responses will be accepted and will be posted as promptly as practical.

Thank you!

Name *

Moke Stephens

Candidate for *

State House District 4

Email *

moke84404@yahoo.com

1. I believe that walking and bicycling should be safe transportation options available to all and we need to drastically reduce injuries and deaths of people who walk and bike. (YES or NO, and any comments) *

Yes

No

Comments?

Providing for safe travel is a legitimate, constitutional, government responsibility and so I am in favor of providing public funding to build sidewalks and bike paths for this purpose.

2. "Safe Passing" laws require that motorists provide sufficient space (3-4 feet for cars) when passing bicyclists; 32 states have such laws. I support the adoption of a "Safe Passing" law in Hawaii with specific passing distances. (YES or NO, and any comments) *

Yes

No

Comments

I don't believe in passing laws that create victimless crimes. Habeas Corpus is a constitutional and just principle. However, I do support programs to educate people in safe driving practices. I think "safe passing" is a good principle, but a bad law.

3. Hawaii received \$171 million in federal transportation funds in 2016. While only ~2% of this amount is reserved for walking and bicycling projects, the state Department of Transportation has the option to use larger portions of these funds for walking and bicycling projects. I support increased use of Hawaii's federal transportation funding allocations for bicycle and pedestrian projects to make walking and bicycling safer. (YES or NO, and any comments) *

Yes

No

Comments

I believe every road should include a shoulder, bicycle lane, and sidewalk, and will support this practice whenever and wherever new roads are built. I will also support adding these features to existing roads, as far as funds allow.

4. The state has a "Complete Streets" law designed to create equality of access for all road users (people walking, biking, driving, and taking transit) by requiring streets to be planned, designed, operated, and maintained to enable safe, convenient and comfortable travel for users of all ages and abilities, regardless of their mode of transportation. I support the strong implementation of "Complete Streets," including creating procedures that ensure full "Complete Streets" consideration on every project. (YES or NO, and any comments) *

Yes

No

Comments

I believe this is a good and wise practice. Providing for the good and safety of society is a constitutional function of government.

5. The state Department of Transportation's 2003 Bike Plan Hawaii provides a plan for development of a network of bicycle facilities that have not been fully implemented. I support the immediate updating of this 13-year-old plan in order to integrate new bikeway planning practices and make it more applicable to current transportation and development conditions. (YES or NO, and any comments) *

Yes

No

Comments

I support the construction of new bike paths, but I need more information about the DOT's 2003 Bike Plan before I can fully commit to support it.

6. Eighty-one percent of Hawaii commuters drive as their primary way of getting to work and 12% walk, bike, or take public transportation. I support the establishment of specific targets to reduce dependence on private automobile transportation and increase bicycling, walking and transit use, as Kauai County has done. (YES or NO, and any comments) *

Yes

No

Comments

I'm not sure what you mean by "targets," but I believe people should be allowed to use whatever means of travel they choose. I believe government should provide safe thoroughfares, but they should not dictate to citizens what means of travel they are, or are not allowed to use.

7. Describe ways that you have supported safer walking and bicycling in your community. (short answer) *

I'm a first-time candidate. Until now, I haven't done much more than speak to my friends and neighbors about the need for bike lanes and sidewalks in our subdivision.

8. The State has the Bike Plan Hawaii (2003) and the Statewide Pedestrian Master Plan (2013) for bicycle and pedestrian improvements. What will you do when elected to implement these plan? (short answer) *

Before I implement any plan, I need to familiarize myself with it. If it falls within the constitutional limits of government, I will sponsor, cosponsor, and/or support its implementation; if not, I am willing to amend it until it does.
