

Walking & Bicycling Questionnaire for Candidates

This State candidate questionnaire was developed by Hawaii Bicycling League, Kauai Path, Maui Bicycling League, and PATH - Peoples Advocacy for Trails Hawaii to address current state issues of importance for walking and bicycling. Your responses will be made available online and distributed to our organizations' email networks. Your response will NOT be used as the basis for any endorsements - your response will be displayed verbatim. Please respond by July 25, 2016. Late responses will be accepted and will be posted as promptly as practical.

Thank you!

Name *

Andria Tupola

Candidate for *

State House Representative District 43

Email *

andriatupola@gmail.com

1. I believe that walking and bicycling should be safe transportation options available to all and we need to drastically reduce injuries and deaths of people who walk and bike. (YES or NO, and any comments) *

Yes

No

Comments?

2. "Safe Passing" laws require that motorists provide sufficient space (3-4 feet for cars) when passing bicyclists; 32 states have such laws. I support the adoption of a "Safe Passing" law in Hawaii with specific passing distances. (YES or NO, and any comments) *

Yes

No

Comments

3. Hawaii received \$171 million in federal transportation funds in 2016. While only ~2% of this amount is reserved for walking and bicycling projects, the state Department of Transportation has the option to use larger portions of these funds for walking and bicycling projects. I support increased use of Hawaii's federal transportation funding allocations for bicycle and pedestrian projects to make walking and bicycling safer. (YES or NO, and any comments) *

Yes

No

Comments

I would support this, however I would have to look comprehensively at how the money used for bicycle and pedestrian would deter funds that are desperately needed for better roads. I'm sure there is a way to balance both needs but it's hard to give the answer without looking at the bigger picture and balancing all the needs.

4. The state has a "Complete Streets" law designed to create equality of access for all road users (people walking, biking, driving, and taking transit) by requiring streets to be planned, designed, operated, and maintained to enable safe, convenient and comfortable travel for users of all ages and abilities, regardless of their mode of transportation. I support the strong implementation of "Complete Streets," including creating procedures that ensure full "Complete Streets" consideration on every project. (YES or NO, and any comments) *

Yes

No

Comments

5. The state Department of Transportation's 2003 Bike Plan Hawaii provides a plan for development of a network of bicycle facilities that have not been fully implemented. I support the immediate updating of this 13-year-old plan in order to integrate new bikeway planning practices and make it more applicable to current transportation and development conditions. (YES or NO, and any comments) *

Yes

No

Comments

6. Eighty-one percent of Hawaii commuters drive as their primary way of getting to work and 12% walk, bike, or take public transportation. I support the establishment of specific targets to reduce dependence on private automobile transportation and increase bicycling, walking and transit use, as Kauai County has done. (YES or NO, and any comments) *

Yes

No

Comments

I'm not really sure what Kauai has done specifically and how funds were used. I would support reducing dependence however it depends on how one would go about getting to that specific target.

7. Describe ways that you have supported safer walking and bicycling in your community. (short answer) *

We are actively clearing land on Pa'akea Road to build a bike path. There is a desire for the road owner and surrounding land owners to see this project come to fruition. It is a large stretch that we are slowly cleaning and clearing the brush. The land owner has offered to help install coplane to create the path. We are partnering with the WCCHC and hopefully the DOH to finish plans for this very soon.

8. The State has the Bike Plan Hawaii (2003) and the Statewide Pedestrian Master Plan (2013) for bicycle and pedestrian improvements. What will you do when elected to implement these plan? (short answer) *

I will help in the areas where my district is involved and offer any resources towards pushing that initiative forward.
