

In Hawaii and across the US, the status quo is killing us. Traffic violence is consistently among the top causes of preventable death, and vulnerable users- people walking, bicycling and using personal mobility aids are paying the highest price. It's time for a **SHIFT** in our vision, our values, and our streets.

In partnership with the City and County of Honolulu and the Hawaii State Department of Health, Hawaii Bicycling League is proud to announce the first statewide Safety & Health in Focus for Transportation (SHIFT) Summit on July 1, 2020 at the Hilton Hawaiian Village. The SHIFT Summit will bring together local and national experts, advocates, academics, agency staff, media, policymakers, and community leaders to advance and strengthen our commitment to ending traffic deaths in Hawai'i.

SHIFT will focus on

- Developing shared language, values, goals, and data
- Increasing public understanding of Vision Zero and the importance of public champions and leadership
- Increasing capacity for peer networking and inter-agency collaborations to create holistic, interdisciplinary plans to advance Vision Zero in Hawaii.
- Increasing policymaker awareness of and commitment to Vision Zero best practices

To make the conference a success, we will require the support of individuals and organizations that share our vision and commitment to a healthier, safer, more inclusive transportation future for Hawai'i.

Please consider the following levels of support and their associated perks and join us making the SHIFT Summit possible.
