

## State of Hawaii Candidate Walking and Bicycling Questionnaire

**Name:** Ana Mo Des

**Candidate for:** House Representative District 16

**Email address:** voteanamodes@gmail.com

1. I believe that walking and bicycling should be safe transportation options available to all, and that we need to drastically reduce injuries and deaths of people who walk and bike.

**YES**

2. I support increased use of Hawaii's federal transportation funding allocations for bicycle and pedestrian projects to make walking and bicycling safer. Hawaii received \$156 million in federal transportation funds in 2019, only 2% (\$3.12million) of this amount is reserved for walking and bicycling projects. The state Department of Transportation can deploy these funds and has the option to use larger portions of federal transportation funds for walking and bicycling projects. This year, at least in part due to COVID19, more people are walking and bicycling than ever.

**YES**

3. The state Department of Transportation's 2003 Bike Plan Hawaii provides a plan for development of a network of bicycle facilities to enable those of all ages to cycle for transportation. The plan has not been fully implemented. Considering the fact that this year there has been a dramatic increase in the sales of bicycles in Hawaii to meet the demand in bicycling, I support the immediate updating of this 15-year-old plan in order to integrate new bikeway planning practices and make it more applicable to current conditions.

**YES**

4. Prior to COVID19 and the year 2020, eighty-one percent of Hawaii commuters drove as their primary way of getting to work and 12% walked, biked, or took public transportation. I support the establishment of specific targets to reduce dependence on private automobile transportation and increase bicycling, walking and transit use, as Kauai County has done.

**NO: I believe the government doesn't have a place in limiting our choices but in expanding them. We will always and should always have the freedom to choose for ourselves and the government should support these choices. There is a lack of infrastructure to support a bicycling choice therefore the government needs to focus on enhancing this option for everyone as they choose.**

5. Vision Zero is a government commitment to achieve zero traffic fatalities tied with a comprehensive approach and specific actions in engineering, enforcement, and education. I support the adoption of a "Vision Zero" policy at the state level and development of a comprehensive plan with specific actions to achieve zero traffic fatalities.

## **State of Hawaii Candidate Walking and Bicycling Questionnaire**

**NO: I believe this to be an unrealistic goal with humanity since we are not machines and I do not believe we should be driven by machines either but I support education and enforcement to avoid injury and fatality.**

6. Red light and speed enforcement cameras have been proven to improve traffic safety for all roadway users (motorists, bicyclists, and pedestrians) by reducing incidents of red light and speed violations. I support the implementation of red light and speed enforcement cameras at high injury intersections and corridors and in school zones.

**YES**

7. In large part due to the Stay at Home orders, we have seen a rise in the numbers of people walking and bicycling. Describe ways that you have supported, or plan to support, safer walking and bicycling in our communities. (short answer)

**When elected my efforts will go into widening the hwy to allow for safe pedestrian and bicycling transportation.**

8. The State has the Bike Plan Hawaii (2003) and the Statewide Pedestrian Master Plan (2013) for bicycle and pedestrian improvements. What will you do when elected to implement these plans? (short answer)

**My focus needs to be for Kauai and especially my district and enhancing the highway to allow for safe passage along with the additional tree covered pathways will be the aim during my time in office.**

9. Trees lower temperature during the day, provide protection from the sun and rain, are a nice buffer to cars, and have a calming effect on traffic. Given that trees make it safer and more comfortable to walk and bicycle, do you support adding more trees to your area's inventory?

**YES: This is a very thoughtful implementation and should be a priority.**
