

## **State of Hawaii Candidate Walking and Bicycling Questionnaire**

**Name:** Trish La Chica

**Candidate for:** State House District 36

**Email address:** hello@trishlachica.com

1. I believe that walking and bicycling should be safe transportation options available to all, and that we need to drastically reduce injuries and deaths of people who walk and bike.

**YES: I strongly support Vision Zero and its implementation statewide**

2. I support increased use of Hawaii's federal transportation funding allocations for bicycle and pedestrian projects to make walking and bicycling safer. Hawaii received \$156 million in federal transportation funds in 2019, only 2% (\$3.12million) of this amount is reserved for walking and bicycling projects. The state Department of Transportation can deploy these funds and has the option to use larger portions of federal transportation funds for walking and bicycling projects. This year, at least in part due to COVID19, more people are walking and bicycling than ever.

**YES**

3. The state Department of Transportation's 2003 Bike Plan Hawaii provides a plan for development of a network of bicycle facilities to enable those of all ages to cycle for transportation. The plan has not been fully implemented. Considering the fact that this year there has been a dramatic increase in the sales of bicycles in Hawaii to meet the demand in bicycling, I support the immediate updating of this 15-year-old plan in order to integrate new bikeway planning practices and make it more applicable to current conditions.

**YES: I and separately, I also worked with Daniel before he left to help promote the Bike Map - I believe my org committed \$2k to this project. Did it ever get completed?**

4. Prior to COVID19 and the year 2020, eighty-one percent of Hawaii commuters drove as their primary way of getting to work and 12% walked, biked, or took public transportation. I support the establishment of specific targets to reduce dependence on private automobile transportation and increase bicycling, walking and transit use, as Kauai County has done.

**YES: Yes! I want to prioritize alternative transportation options from Mililani.**

5. Vision Zero is a government commitment to achieve zero traffic fatalities tied with a comprehensive approach and specific actions in engineering, enforcement, and education. I support the adoption of a "Vision Zero" policy at the state level and development of a comprehensive plan with specific actions to achieve zero traffic fatalities.

**YES: YES!**

## **State of Hawaii Candidate Walking and Bicycling Questionnaire**

6. Red light and speed enforcement cameras have been proven to improve traffic safety for all roadway users (motorists, bicyclists, and pedestrians) by reducing incidents of red light and speed violations. I support the implementation of red light and speed enforcement cameras at high injury intersections and corridors and in school zones.

**YES**

7. In large part due to the Stay at Home orders, we have seen a rise in the numbers of people walking and bicycling. Describe ways that you have supported, or plan to support, safer walking and bicycling in our communities. (short answer)

**HIPHI has always prioritized proposals to promote safe streets and improve walking and biking. We helped to pass Complete Streets into law, we worked on getting Vision Zero resolutions passed in the various counties, and we help to defend and bills that erode our complete streets laws (removing bulb outs). Here in Mililani as a member of our NB, I publicly supported the completion of the bicycle/pedestrian expansion along Kipapa bridge.**

8. The State has the Bike Plan Hawaii (2003) and the Statewide Pedestrian Master Plan (2013) for bicycle and pedestrian improvements. What will you do when elected to implement these plans? (short answer)

**Advocate for funding for agencies and organizations that can help implement the recommendations provided in the plan and also support county efforts to adopt these into county plans**

9. Trees lower temperature during the day, provide protection from the sun and rain, are a nice buffer to cars, and have a calming effect on traffic. Given that trees make it safer and more comfortable to walk and bicycle, do you support adding more trees to your area's inventory?

**YES: I think Mililani is a great example of a walkable and bikable community. In the afternoon, lots of families are out engaging in physical activity. I would like to also replicate such projects in neighboring towns - Waialua, Waipahu, Waipio, Wahiawa.**
