

State of Hawaii Candidate Walking and Bicycling Questionnaire

Name: Matt LoPresti

Candidate for: State House of Representatives, District 41

Email address: matt_lopresti@yahoo.com

1. I believe that walking and bicycling should be safe transportation options available to all, and that we need to drastically reduce injuries and deaths of people who walk and bike.

YES: I used to bike to work, school, the store, everything when I lived in town. It was always dangerous but enjoyable.

2. I support increased use of Hawaii's federal transportation funding allocations for bicycle and pedestrian projects to make walking and bicycling safer. Hawaii received \$156 million in federal transportation funds in 2019, only 2% (\$3.12million) of this amount is reserved for walking and bicycling projects. The state Department of Transportation can deploy these funds and has the option to use larger portions of federal transportation funds for walking and bicycling projects. This year, at least in part due to COVID19, more people are walking and bicycling than ever.

YES: The state DOT has long resisted common sense and affordable measures for making a safer, healthier transportation network on Oahu. This has to change.

3. The state Department of Transportation's 2003 Bike Plan Hawaii provides a plan for development of a network of bicycle facilities to enable those of all ages to cycle for transportation. The plan has not been fully implemented. Considering the fact that this year there has been a dramatic increase in the sales of bicycles in Hawaii to meet the demand in bicycling, I support the immediate updating of this 15-year-old plan in order to integrate new bikeway planning practices and make it more applicable to current conditions.

YES: Great idea to push hard for this now. I am particularly disappointed the State DOT is still dragging its feet on the Leeward Bikeway. They keep making promises but don't follow through. I will hold their feet to the fire on this.

4. Prior to COVID19 and the year 2020, eighty-one percent of Hawaii commuters drove as their primary way of getting to work and 12% walked, biked, or took public transportation. I support the establishment of specific targets to reduce dependence on private automobile transportation and increase bicycling, walking and transit use, as Kauai County has done.

YES

5. Vision Zero is a government commitment to achieve zero traffic fatalities tied with a comprehensive approach and specific actions in engineering, enforcement, and education. I support the adoption of a "Vision Zero" policy at the state level and development of a comprehensive plan with specific actions to achieve zero traffic fatalities.

State of Hawaii Candidate Walking and Bicycling Questionnaire

YES

6. Red light and speed enforcement cameras have been proven to improve traffic safety for all roadway users (motorists, bicyclists, and pedestrians) by reducing incidents of red light and speed violations. I support the implementation of red light and speed enforcement cameras at high injury intersections and corridors and in school zones.

YES : More red light cameras than speed enforcement ones though. The state tried that a while back and there was great resistance. It depends on how that is implemented and where. But red light cameras, yes.

7. In large part due to the Stay at Home orders, we have seen a rise in the numbers of people walking and bicycling. Describe ways that you have supported, or plan to support, safer walking and bicycling in our communities. (short answer)

My family and I regularly go on bike rides since the stay at home order has gone into effect. My wife and I bought new bikes for the first time in a long long while and we encourage safety with our kids and the neighbor kids by talking about the rules of the road, safety lights, we got reflective vests, and always always helmets. The safest thing though has been designated places for our bikes on wide sidewalks and designated bike lanes on the roads.

8. The State has the Bike Plan Hawaii (2003) and the Statewide Pedestrian Master Plan (2013) for bicycle and pedestrian improvements. What will you do when elected to implement these plans? (short answer)

I am especially keen on seeing them complete the leeward bikeway.

9. Trees lower temperature during the day, provide protection from the sun and rain, are a nice buffer to cars, and have a calming effect on traffic. Given that trees make it safer and more comfortable to walk and bicycle, do you support adding more trees to your area's inventory?

YES
