

State of Hawaii Candidate Walking and Bicycling Questionnaire

Name: Tess Abalos Quilingking

Candidate for: Hawaii State House of Representatives District 30

Email address: voteTess2020@gmail.com

1. I believe that walking and bicycling should be safe transportation options available to all, and that we need to drastically reduce injuries and deaths of people who walk and bike.

YES: I walk everyday. Walking and biking doesn't only help with physical and mental health but it will drastically reduce air pollution, noise pollution, congestion.

2. I support increased use of Hawaii's federal transportation funding allocations for bicycle and pedestrian projects to make walking and bicycling safer. Hawaii received \$156 million in federal transportation funds in 2019, only 2% (\$3.12million) of this amount is reserved for walking and bicycling projects. The state Department of Transportation can deploy these funds and has the option to use larger portions of federal transportation funds for walking and bicycling projects. This year, at least in part due to COVID19, more people are walking and bicycling than ever.

YES: I was so happy to see more people enjoying the outdoors walking and bicycling. If we have the designated walking and bicycling path all around the Island, I believe more people will come out with their family on a bike ride or walking instead of always in a car to go to a park or to the beach. This will be great for the well being of our seniors as well. The same goes for visitors, they will have more option besides to drive to their destination. it might even bring more visitors to come bicycling here. When I travel, I book my hotel where there is a bike/walk path to the business area or to the grocery store so that I can do my walk instead of driving. Less pollution I bring to their community. Same goes for our Islands.

3. The state Department of Transportation's 2003 Bike Plan Hawaii provides a plan for development of a network of bicycle facilities to enable those of all ages to cycle for transportation. The plan has not been fully implemented. Considering the fact that this year there has been a dramatic increase in the sales of bicycles in Hawaii to meet the demand in bicycling, I support the immediate updating of this 15-year-old plan in order to integrate new bikeway planning practices and make it more applicable to current conditions.

YES

4. Prior to COVID19 and the year 2020, eighty-one percent of Hawaii commuters drove as their primary way of getting to work and 12% walked, biked, or took public transportation. I support the establishment of specific targets to reduce dependence on private automobile transportation and increase bicycling, walking and transit use, as Kauai County has done.

YES

State of Hawaii Candidate Walking and Bicycling Questionnaire

5. Vision Zero is a government commitment to achieve zero traffic fatalities tied with a comprehensive approach and specific actions in engineering, enforcement, and education. I support the adoption of a “Vision Zero” policy at the state level and development of a comprehensive plan with specific actions to achieve zero traffic fatalities.

YES

6. Red light and speed enforcement cameras have been proven to improve traffic safety for all roadway users (motorists, bicyclists, and pedestrians) by reducing incidents of red light and speed violations. I support the implementation of red light and speed enforcement cameras at high injury intersections and corridors and in school zones.

YES : I support whatever is proven that helps with safety.

7. In large part due to the Stay at Home orders, we have seen a rise in the numbers of people walking and bicycling. Describe ways that you have supported, or plan to support, safer walking and bicycling in our communities. (short answer)

Encouraged, and encouraging everyone to walk and bicycle in a park or path because it's safe.

8. The State has the Bike Plan Hawaii (2003) and the Statewide Pedestrian Master Plan (2013) for bicycle and pedestrian improvements. What will you do when elected to implement these plans? (short answer)

Priority is to get it funded and to get an ongoing public involvement.

9. Trees lower temperature during the day, provide protection from the sun and rain, are a nice buffer to cars, and have a calming effect on traffic. Given that trees make it safer and more comfortable to walk and bicycle, do you support adding more trees to your area's inventory?

YES: Not only that is has a calming effect but they also remove carbon dioxide from the air, storing carbon in the trees and soil, and releasing oxygen into the atmosphere.
