

## **State of Hawaii Candidate Walking and Bicycling Questionnaire**

**Name:** Joseph Kaahema Simpliciano jr  
**Candidate for:** State Representative district 44  
**Email address:** jks2020hui@gmail.com

1. I believe that walking and bicycling should be safe transportation options available to all, and that we need to drastically reduce injuries and deaths of people who walk and bike.

**YES**

2. I support increased use of Hawaii's federal transportation funding allocations for bicycle and pedestrian projects to make walking and bicycling safer. Hawaii received \$156 million in federal transportation funds in 2019, only 2% (\$3.12million) of this amount is reserved for walking and bicycling projects. The state Department of Transportation can deploy these funds and has the option to use larger portions of federal transportation funds for walking and bicycling projects. This year, at least in part due to COVID19, more people are walking and bicycling than ever.

**YES: The projects geared toward this should be approved by the community which it impacts based off of future projects, for Waianae my plan has been to implement a bike, run, walk route for my community to get exercise and travel back and forth from Maili to Waianae on the ocean front.**

3. The state Department of Transportation's 2003 Bike Plan Hawaii provides a plan for development of a network of bicycle facilities to enable those of all ages to cycle for transportation. The plan has not been fully implemented. Considering the fact that this year there has been a dramatic increase in the sales of bicycles in Hawaii to meet the demand in bicycling, I support the immediate updating of this 15-year-old plan in order to integrate new bikeway planning practices and make it more applicable to current conditions.

**YES**

4. Prior to COVID19 and the year 2020, eighty-one percent of Hawaii commuters drove as their primary way of getting to work and 12% walked, biked, or took public transportation. I support the establishment of specific targets to reduce dependence on private automobile transportation and increase bicycling, walking and transit use, as Kauai County has done.

**YES: This would work great in areas that is more urban opposed to areas in Waianae where we do not have much jobs for our people, where we must travel outside of Waianae for employment. The Rail is not accommodating to the people of Waianae as it begins and ends in Kapolei.**

5. Vision Zero is a government commitment to achieve zero traffic fatalities tied with a comprehensive approach and specific actions in engineering, enforcement, and education. I

## **State of Hawaii Candidate Walking and Bicycling Questionnaire**

support the adoption of a “Vision Zero” policy at the state level and development of a comprehensive plan with specific actions to achieve zero traffic fatalities.

**YES**

6. Red light and speed enforcement cameras have been proven to improve traffic safety for all roadway users (motorists, bicyclists, and pedestrians) by reducing incidents of red light and speed violations. I support the implementation of red light and speed enforcement cameras at high injury intersections and corridors and in school zones.

**YES**

7. In large part due to the Stay at Home orders, we have seen a rise in the numbers of people walking and bicycling. Describe ways that you have supported, or plan to support, safer walking and bicycling in our communities. (short answer)

**I have personally brought speeding issues to every representative, senator and city and state departments from 2011 until now. There has been no attempt by anyone in office to remedy this. My ohana has been instrumental at holding these people accountable to ensure the safety of keikis who attend our public schools are met. It wasn't until 2019 that we finally got a crosswalk and signage in an area where school kids must cross the road.**

8. The State has the Bike Plan Hawaii (2003) and the Statewide Pedestrian Master Plan (2013) for bicycle and pedestrian improvements. What will you do when elected to implement these plans? (short answer)

**I will personally hold these people responsible and ensure that these plans are met. The safety of all people should come before anything else.**

9. Trees lower temperature during the day, provide protection from the sun and rain, are a nice buffer to cars, and have a calming effect on traffic. Given that trees make it safer and more comfortable to walk and bicycle, do you support adding more trees to your area's inventory?

**YES: Yes in Waianae I want to remove the invasive Kiawe trees that fall over due to it not being able to survive in a sandy and coral environment, high winds always makes it an issue as it either falls onto Farrington Highway or the power lines. This has been my idea for sometime now as it would beautify our public beaches and parks especially for my community members.**
